

Digital Channel Guide

Soon Basic Cable channels will be transmitted exclusively in digital format.

These Limited Cable channels are not affected by the network upgrade. You can continue to view these channels on any television connected to cable. No special equipment will be required.

2	C-SPAN	9	KABY-ABC	18	KAUN-RTN
3	KDLO-CBS	10	My NetworkTV	19	Celebrity Shopping
4	CNN	11	WGN America		Network

If you do not have a Digital Adapter or other digital equipment installed or have a TV with an internal digital QAM tuner, you will not be able to view these channels when the digital upgrade is complete. The upgrade will begin in your area after November 1st. *These channels, previously upgraded to digital delivery, will once again be in your channel lineup when you are connected with a Digital Adapter, digital equipment or a TV with an internal QAM tuner.

These additional channels will be available with a DVR or Digital Receiver.

What you need to know.

What is happening to my service?

Midcontinent Communications is upgrading our Basic Cable channel lineup (channels between 23 and 99) to a digital signal. By converting these channels to digital delivery, we will have more bandwidth available to add HD channels, additional On Demand programming and even faster Broadband speeds very soon.

Why is this happening now?

We are investing in technology that will deliver digital cable quality today and give you more programming choices in the future. Each year, the number of customers with HD TVs increases, as well as the number of HD TV networks and HD programs available. By converting our analog signals to digital, we can provide more of what our customers are requesting -- more HD channels, more On Demand HD programming and faster Internet speeds.

Will I need to get extra equipment?

It depends on what type of television(s) you have in your home or business and what equipment you already lease from Midcontinent and have connected to your televisions. Most newer televisions (those manufactured after 2006) already have an internal digital QAM tuner. On those televisions, you will be able to receive the digital signal through your cable connection without additional equipment. If you already have a digital device (Digital Receiver, CableCARD, DVR or HD receiver) from Midcontinent connected to each TV, you won't need additional equipment for that television. For older televisions, you will need a Digital Adapter or another type of digital device from Midcontinent. Each customer is eligible to receive up to two Digital Adapters free of leasing charges from Midcontinent.

What if I don't do anything?

After the upgrade is complete, any TV connected directly to Midcontinent service without a digital device (Digital Adapter or other device from Midcontinent) or internal tuner will have access only to channels 2-22 and will lose access to channels 23 and above.

Choose what's right for you.

Not sure which digital equipment you need? Check out what each choice gives you.

With this equipment on your TV...	Here's what you'll receive...	Cost/month...*
HD Digital Video Recorder (DVR) 	<ul style="list-style-type: none"> All the Basic Cable channels you had before (23-75), plus digitally delivered networks like CMT and KELO WeatherNow Access to On Demand and more Access to HD Broadcast networks Interactive Program Guide 	• \$16 per month
HD Digital Video Receiver (HDDCT) 	<ul style="list-style-type: none"> 46 channels of commercial-free music Pause and rewind live TV, record single programs or a whole series and save them as long as you want. (Not available with HDDCT) 	• \$8 per month
Digital Receiver (DCT) 	<ul style="list-style-type: none"> All the Basic Cable channels you had before (23-75), plus digitally delivered networks like CMT and KELO WeatherNow Access to On Demand and more Interactive Program Guide 46 channels of commercial free music 	• \$4 per month
Digital Adapter 	<ul style="list-style-type: none"> All the Basic Cable channels you had before (23-75), plus digitally delivered networks like CMT and KELO WeatherNow 	• Up to two FREE**
No digital equipment	<ul style="list-style-type: none"> Midcontinent's Limited Cable channels 2-22 	

*Cost per month for first piece of equipment (DVR, HDDCT, DCT) may be reduced depending on package level. **Limit 2 free per package. Additional Digital Adapters can be leased for a \$2 monthly charge. Restrictions apply. Service not available in all areas. Limited to residential customers. Not available to Limited Cable customers. The digital equipment needs being referenced are for Classic or Basic Cable package subscriptions. DVR, HDDCT or DCT and remote required to receive On Demand services. Actual number of On Demand titles may vary depending on subscription level or package. Pricing and service options subject to change.

Frequently Asked Questions

What is a Digital Adapter?

A Digital Adapter is a small device that converts our digital signal into an analog signal so it can be displayed on older analog televisions. TVs without an internal tuner or not already connected to digital equipment from Midcontinent will need to be connected to a Digital Adapter for you to be able to view channels 23 and higher after the upgrade is complete. You will not need an adapter, tuner, or any digital device to view channels 2-22.

How do I know if my television has an internal digital QAM tuner?

If your television does have an internal digital QAM tuner, you can view the digital channels without additional equipment on that television. To check, you can perform a channel scan on your television to view the digital channels that are available today. Most newer televisions -- those manufactured after 2006 -- have an "auto-scan" feature and channels will display with a number and a dash or a decimal (i.e. channel 32-5 or 32.5).

If I already have a Digital Receiver (set-top box) or DVR, do I need a Digital Adapter as well?

No. You will not need a Digital Adapter. Digital Adapters will only be needed for older televisions that do not have any other type of equipment from Midcontinent connected to them.

What is the difference between a Digital Receiver or DVR and the Digital Adapter that is free?

The Digital Adapter is a smaller device and does not support our Interactive Program Guide, Music Choice, On Demand, HD programming or personal settings like Parental Controls.

Order. Install. Activate.
